**THE PIONEER
ELECTRICAL SUPPLY
HOUSE**

Established
January, 1894

The entire Buildings, 35, 37 and 39 N. Seventh Street and 629 and 631 Filbert Street, approximately 50,000 square feet of floor space, are used exclusively to carry on our business.

GENERAL INFORMATION AND TERMS

How to Order: We have assigned to each article listed a description, or number, which should always be used in ordering, or asking for quotations.

Shipments: Customers should send shipping instructions with all orders. Unless such information is clearly specified, we will use our own judgment in routing shipments. We maintain a traffic department that keeps thoroughly posted on all details connected with the most economical and speedy routing of shipments.

Parcel Post Insurance: Shipments made by parcel post will be insured against loss, unless customers instruct us otherwise. The usual insurance charge for this will be made on all shipments.

Liability: We exercise the utmost care in packing and shipping merchandise, and obtain proper receipts from the transportation companies. In case of loss or breakage, claim should be made on the transportation company, for we cannot be held responsible.

Return of Goods: Before returning goods, *be sure* and apply to us for shipping instructions. This assures the rendering of proper credit without delay. We are not responsible for goods returned without our permission.

All possible care is used to fill orders correctly, and we stand ready at all times to rectify mistakes that we make and without any expense to our customer. When the return of goods is made necessary for reasons beyond our control, a charge of not less than 10% will be made to cover the cost of handling, and Radio, wire and fixtures 20%.

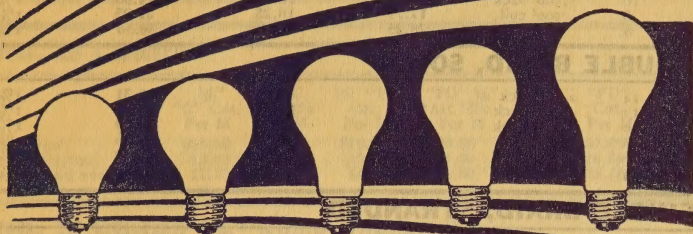

Prices: All published prices are subject to market fluctuations and to change without notice.

Financial Standing: To avoid delay, purchasers with whom we have no account should accompany their first order with references, or if parcel post or express C. O. D. shipment, or sight draft, bill-of-lading shipment is desired, order should be accompanied by a deposit of 25% of the amount of the order.

Terms: To customers of approved credit our bills are payable in 30 days net, or subject to a cash discount on the following basis: Bills rendered from the 1st to the 15th of the month subject to cash discount if paid by the 25th, and those rendered from the 15th to the 30th of the month subject to cash discount if paid by the 10th of the following month.

PEERLESS

National MAZDA Lamps

Provide the fundamentals of good lighting.

1. THE PEARL GRAY BULB looks better against any fixture, shade or background, because it changes its color to harmonize with them.
2. EASY TO CLEAN. Because the frosting is on the inside of the bulb, the outer surface is smooth, sheds dust, and cleans at the touch of a cloth.
3. GIVES MORE LIGHT than any previous frosted lamp—practically as much as clear lamps—yet greatly reduces glare.
4. MORE RUGGED. The strength has been so greatly increased that it will stand more rough handling, even abuse.
5. COSTS LESS than previous lamps—less, in fact, than the cheapest (clear) types did a year ago.

Clean to Handle—Finished with high grade buff colored enamel that is clean to handle and will not chip off.

Well Packed—Both tubing and fittings packed in strong, neat cases that are easy to stock and to handle.

Costs Less—Costs less to buy and to install than any other surface raceway of like capacity.

WIRING SYSTEM

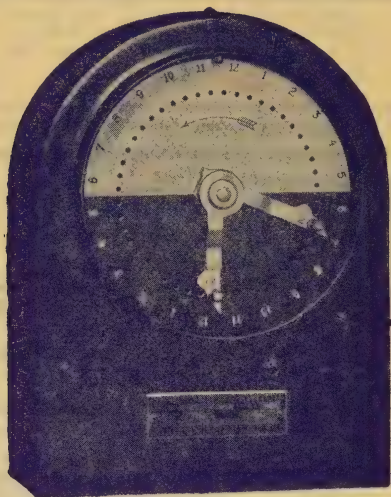

—for lifetime service

Two short years ago, a wiring job was just a wiring job to the average customer. All he wanted to know was, "How little can you do it for?" Price was the only yardstick men had to judge a job by—and to land a bid, the contractor had to cut prices and profits to the bone.

Now thousands of contractors are selling comfort, convenience and quality instead of price. They are landing bigger jobs—and at good profit. Two years of G-E Wiring System advertising have been teaching the public to demand complete wiring at a fair price, instead of a minimum job at a cut price.

Automatic Time Switches (Motor Operated)

Indoor Type T-8 Automatic Time Switch

Operation and Distinctive Features

These switches are unique in that the timekeeping and propelling member is a small synchronous motor. The motor keeps accurate time and moreover provides ample power to operate the switch mechanism reliably at all times. The combination of accurate time keeping with adequate power for reliable switch operation, together with the "no-winding" feature, places these switches in a class by themselves. Such achievements have been found in the very high-priced class of time switches. They are now offered in a very moderately priced line.

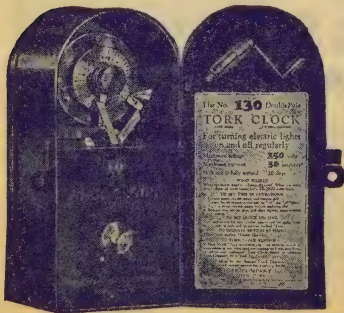

A small, inexpensive time switch embodying the prominent features of the larger switch, namely—**Accuracy, Reliability, and No Winding.**

ENCLOSED-TYPE FARADAY GONGS

N. E. C. Standard—Schedule E VIBRATING—WEATHERPROOF FOR BATTERY

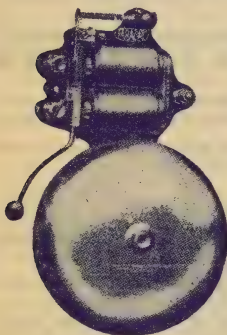

Recommended wherever gongs are to be exposed to dust, dampness or mechanical injury. Used for important signal work by railroads, fire alarm companies, etc. Designed to operate on battery circuits. Equipped with high power armature. Breakage of tension spring does not disable gong. Contacts regularly platinoid. Pure platinum can be furnished when so ordered. Bauer-Barff finished gong. Gongs to be wired in multiple.

Specify Model No. and voltage when ordering.

SKELETON FARADAY BELLS

Schedule E VIBRATING TYPE—MODEL "O" FOR BATTERY CIRCUITS

Skeleton Bells meet the requirements of a good signal gong with exposed mechanism; they are not as desirable as Enclosed Type shown on another page, but are still used in large quantities. Wound to any special resistance at standard list additions shown elsewhere in this catalog; also furnished Converted-Single-Stroke when specially ordered at \$2.50 net additional, but for important Single-Stroke work Multiple-Gear Single-Stroke Bells are recommended.

Loxon Lamp Guards

"Loxon Protection Guards to Perfection"

It is practical economy to protect lamps with Loxons and especially since the advent of Mazda Lamps. Theft and breakage are total losses. Loxon prevents both and at single cost. All guards are well designed, heavily tinned, and made to fit lamps correctly.

X-Ray Window Units

"JACK" No. 400

"JILL" No. 410

For 150 Watt Mazda Lamp. Holder FREE.

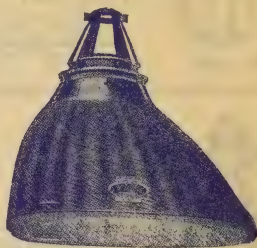

"Jack" No. 400 is the newly developed X-Ray Reflector for the 150-watt lamp. Can also be used with 100-watt lamp. It is a "high-trim" reflector for *deep* windows.

For 150 Watt Mazda Lamp. Holder FREE.

"Jill" No. 410 is the semi-concentrating X-Ray Reflector also recently developed for the 150-watt Mazda lamp. Can be used with 100-watt lamp. For *shallow*, "low-trim" windows.

"KING" No. 500

"QUEEN" No. 510

For 200 Watt Mazda Lamp. Holder FREE.

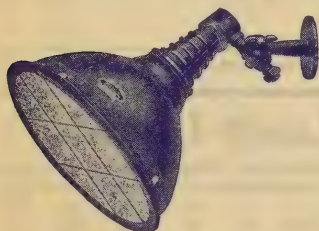

"King" No. 500 is another new X-Ray development for the 200-watt Mazda lamp. Suited to large windows with *deep* background and high ceiling.

For 200 Watt Mazda Lamp. Holder FREE.

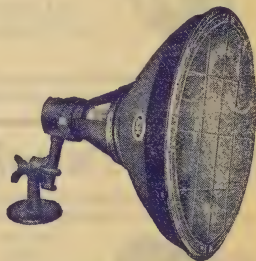

"Queen" No. 510 is the semi-concentrating 200-watt size.

"Queen" should be used in large windows that are *shallow* but have high ceilings.

510	6.00	4.59	4.32	4.05

"FLOOD RAY" No. 33

"HIPPO" No. 88

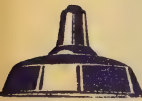

The X-Ray window flood-light may be used in large or small windows whether or not other lighting is available. For the intense "high-lighting" effects necessary where elimination of reflection in the plate glass during daylight hours is desired, use X-Ray No. 88 "Hippo" with 500-watt Mazda lamp. Color equipment supplied if desired.

Where it is necessary to employ more than a single light source to secure the proper flexibility, use No. 33 Window Flood-lights which may be equipped with Color Mediums (red, blue, green, amber) and use the 200-watt Mazda "C" lamp.

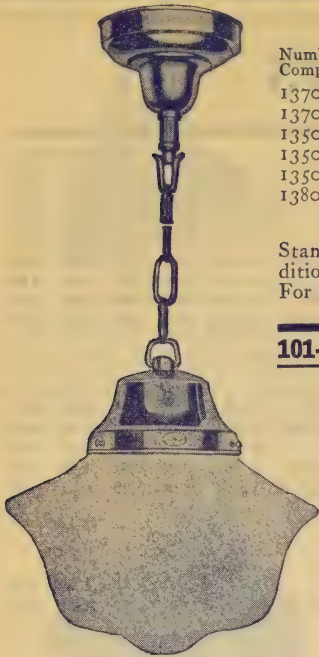

Cat. No.	List	Dealer Net
33 with color equipment	\$12.00	\$8.10
33 without color equipment	10.00	6.75
88 Hippo complete with color screens	25.00	16.88
88 Hippo without screens	21.00	14.18

Send sketches with details and we will be pleased to make recommendations for correct window lighting.

BUSS LIGHTS

With Paper Parchment Shades

No. 3349

No. 3350

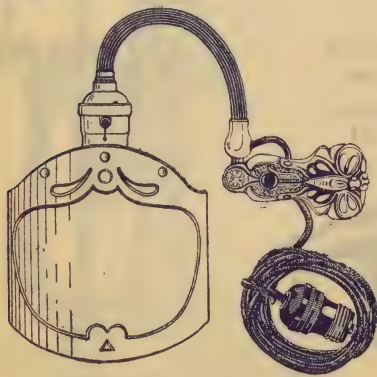

No. 3447

No. 3448

A handy little all-purpose light retailing for only **\$3.00**. Made in ivory and bronze finishes. Stands 11 inches high and has a plate in the base which forms a clamp. All four models are the same price.

Less than 12 lights, **\$2.10 ea.**12 lights or more, **\$2.00 ea.****ASSORTMENT PERMITTED. LAMPS NOT INCLUDED***Attachette***DETAILED DESCRIPTION**

ATTACHETTE: The Clamp consists of rigid stamped steel back piece and ornamental cast face piece, connected and adjusted by screw bolt and wing nut, which give an effective grip up to 2 in. The Bracket Arm is of fluted tubing which carries a push button lamp socket joint.

SHIELD: Consists of a substantial stamped Metal Frame which is held firmly in position by screwing the lamp base through a fibre ring. Channels at the sides of the Shield Frame permit the insertion of parchment or other decorative Fillers, which may be changed at will.

Adjustable Heat Control

Super-Automatic Iron

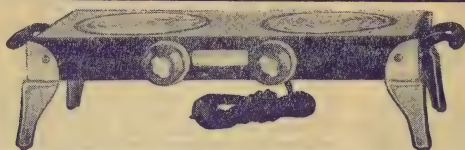

No. 905

Here is the final and most startling development ever achieved in electric irons. This iron is both automatic and adjustable. It not only maintains a constant even ironing heat by means of the thermostat within, but it can also be adjusted to maintain that constant even heat at whatever temperature a woman prefers, by the simple turn of the regulator within the bail.

Furnished complete with the Liberty 6 ft. cord set, attachment plug and heater plug.

Telechron

THE ELECTRIC TIMEKEEPER

OBSERVATORY TIME

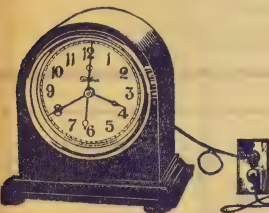

Direct from Your Light Current

NO TEMPERAMENTAL SPRINGS
TO GO WRONG

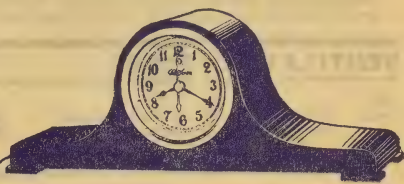

WALL MODEL

Oak, Mahogany or White
Enamel Finish

GOTHIC TYPE—Mahogany Case

BOUDOIR MODEL—Mahogany Case

No other timekeeper can be built on the exclusive and decidedly unique principle of the Telechron. The Telechron is motor *driven* by a tiny synchronous motor, which receives its timing impulses *direct from the light current*, and once connected and set, it brings you Observatory Time.

The operation of the Telechron is marvelously simple.

There is no "clock" mechanism, no springs, no escapement, to cause trouble. Just the wonderful little motor which has been described by the Department Electrician of the New York City Police Department as "durable as an army mule!"

In short, the Telechron motor is electrically and mechanically correct,—just perfect for the timekeeping use to which it is put in many thousands of homes, offices and industrial plants the country over.

Use newspapers to tell your prospects that you sell it.

Build up prospect lists through satisfied customers.

Trim your windows and have a demonstrator ready at all times.

Plan to sell G-E Cleaners—there's real profit waiting!

Order G-E Cleaners today!

Advantages of the G-E Cleaner

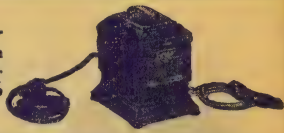

- 1 *No oiling*—it has a General Electric motor with ball bearings that are packed in lubricant.
- 2 *Unusually strong suction*—because of its seven-blade, spot welded, non-destructible fan.
- 3 *Dust-proof bag*—of blue twill with trap in throat which prevents dirt from falling back into air passage.
- 4 *Easy-to-empty bag*—has extra large opening at top.
- 5 *Bag perfectly sealed*—patented, spring type bag clamp.
- 6 *Light weight*—cleaner body, motor base and cap are of aluminum.
- 7 *Adjustable*—suction loss prevented by nozzle adjustment screw on front axle which keeps the lips of the nozzle parallel to the floor, whether cleaning long nap rugs or bare floors.
- 8 *Handle lock*—the handle can be locked in any position, but a spring keeps it upright unless it is locked.
- 9 *Snap-on, self-cleaning brush*—for loosening surface litter—threads, hair, lint.
- 10 *Special casters*—making cleaner particularly easy to maneuver.
- 11 *Pistol-grip handle*—comfortable, with rubber bumper on end to prevent marring of furniture. Trigger switch always at finger tips.
- 12 *Long cord*—twenty feet. Large, rounded hooks to prevent cutting of cord.
- 13 *Guaranteed*—by General Electric for one year.
- 14 Set of six practical attachments—easy to connect and use.
